Capstone project Members: Palak Jain   [339CS20014]
                                    Puneet Pammannavar   [339CS20019]
                                    Shivtej Ghorpade   [339CS20024]
                                    Shreyas Kumbar   [339CS20025]

Week-9

Date	Risk or Issue	Description	Resolution	Status
	Designing	Validation Protocol is defined as a written plan describing the process to be validated, including production equipment and how validation will be conducted.	Create validation plan. Define system requirements. Create the validation protocol and test specification & test then revise procedures and final report.	Done
	Finding the software requirement.	Requirement specifications are developed, the requirements mentioned in this document are validated. There can be illegal, impractical solution or experts may interpret the requirements incorrectly	Here the requirements are analysed, documents are validated and software's are managed as per the system requirements.	Done
